

Gate Info Guide

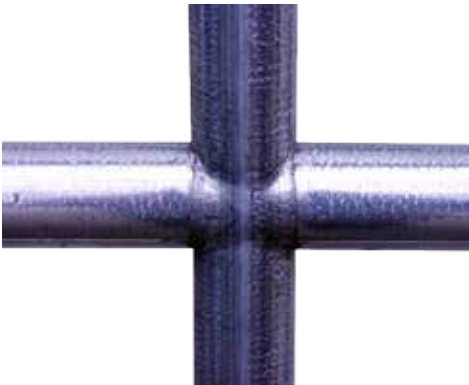

System Round Tube Gates

Our System-manufactured gates are made from a unique process involving piercing and pressing with a 120-ton press. Our gates have no sharp edges and start from high-tensile galvanized steel tubing for long-lasting swinging. Our black powder-coated gates are the only ones on the market that use galvanized steel that will never rust.

- 6-bar, 1 5/8" pre-galvanized steel tubing
- No-weld design
- 48" height
- Hinge bolts sold separately
- Available galvanized or painted
- Also available with mesh inserts

These light duty gates are great for front entrance ways, equipment access, small animal confinement, and other general purpose uses. They are not suitable for use with large animals and stock pressure.

- 6-bar, 1 3/4" round high-tensile strength galvanized tubing
- Gates from 4' to 16' in-stock and ready to ship
- Gates include hinges, hinge pins, and a 22" snap chain
- All gates are 3" shorter than listed length to allow for gate hardware and proper clearance
- 50" height
