

Non-Slip Rubber I-Tiles

- Clean and non-slip surface for aisle ways
- Gives horses and people more security when walking
- Remains non-slippery—even when wet
- Rubber-like compound
- Less stress on horse's legs and joints
- Excellent for wash stalls, aisle ways, entrances, and paddock lead outs
- Can be installed on concrete, asphalt, or directly on a properly completed stone dust base
- UV Stabilized
- Large style paver interlocks to prevent shifting

I-Tiles can be laid similar to interlocking bricks on stone dust or directly on concrete. They are an excellent addition to any barn. Very small surface grooves makes for easy cleaning. Made in Germany. Also sold as individual tiles.
