## Introduction

---

The Braecrest Stall Series takes ownership of clean lines, strength, and beauty. Wood is horizontal under the grill and vertical on the doors creating a very unique look and feel to the stall. Grill bars extend up behind the rolling round track for no obstructions of view for viewing the horse or the horse looking out. The doors are available in a variety of options and are fully welded together. Grill work is in one piece and the grill bracket makes for easy installation of the grill work. With a variety of add-ons and customizations available, you can make this system look exactly the way you want it to. Choose from either hot-dipped galvanized or premium powder-coated finishes to match existing elements in your barn.

- High strength fully welded grill section
- Corrosion-resistant
- Combination of horizontal and vertical wood elements
- Easily customized for your unique building

## Why Choose System Stalls?

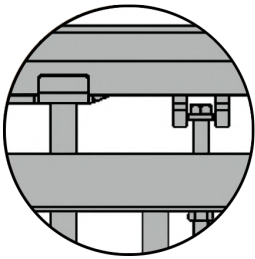

---

With so many options when choosing stalls for horses, things can sometimes be confusing; at System Equine we make it easier. Whether you own a two-stall private barn or a 60-stall boarding facility, you can be assured we have a stall system to meet your needs.

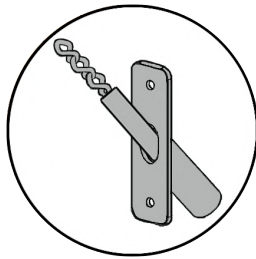

Our stalls are constructed with a high level of attention to detail, excellence of craftsmanship, along with the safety of horse and owner in mind. In our welded systems (every stall series except Standard), each bar is placed through pre-punched holes in the u-channel then welded securely in place for the most durability and best look. Alternatively, sonic welds or spot welding will show depletions over time. Our enclosed round track hardware for sliding doors and heavy-duty two-way adjustable hinges with Delran bushings will keep your stall functioning and feeling smooth for years to come.

Whichever stall system you choose, you can be sure that System Equine will be with you every step of the way. Our trained staff is here to answer your questions and provide decades of experience with finding the right horse stall, stall supplies, and other equine products for your facility. Our team includes some of the most skilled horse stall designers and builders in the world, that's the System advantage.
