About the Finish Line Stall Series

Our Finish Line Stall Series—made popular by Standardbred and Thoroughbred training centres—can be a great economical welded stall choice for all types of equine facilities. Characterized by our welded half swing or full swing door to provide added ventilation and socialization to your stalls at an affordable price. As part of our Freestanding Collection, panels join together or can also be installed with support posts. The Finish Line Stall Series is available hot-dipped galvanized or in a powder-coated finish and is an excellent choice for free-span buildings, drive sheds, or wide open spaces. Choose from a large variety of options to suit your facility or give us a call if you had something else in mind.

- Economical panel stall option
- Same as Freedom without feed door and added hinged gate
- Excellent option for free-span buildings, drive sheds, or wide open spaces
- Easiest installation—panels pin together
- Temporary or permanent (no posts required, but they can be used)

Includes: 7.5' high front frame including grill and half swing door with wraparound chain latch. Lumber not included.

The help and support we received from System Equine was phenomenal. We purchased Dutch doors, Dutch windows, Standard stalls and StableComfort flooring. The feed doors in our new stalls make feeding time a breeze and our beautiful horseshoe latches complete the stalls with style. The StableComfort flooring reduces bedding costs, and if the horses could speak they would tell you that they are very comfortable. System Equine was there to help with all our needs and questions. The delivery of the products always met our schedule, even when we ordered at the last minute. Today our facility is complete and looks great thanks to the service and products we purchased from System Equine.

Why Choose System Equine?

With so many options when choosing stalls for horses, it can sometimes get a little confusing; at System Equine we make it easier. Whether you own a two-stall private barn or a 60-stall boarding facility, you can be assured we have a stall system to meet your needs.

Our stalls are constructed with a high level of attention to detail, excellence of craftsmanship, along with the safety of horse and owner in mind. In our welded systems (every stall series except Standard), each bar is placed through pre-punched holes in the u-channel then welded securely in place for the most durability and cleanest look. Alternatively, sonic welds or spot welding will show depletions over time. Our enclosed round track hardware for sliding doors or heavy-duty two-way adjustable hinges with Delrin bushings for hinged doors will keep your stall functioning smoothly for years to come.

Whichever stall system you choose, you can be assured that System Equine will be with you every step of the way. Our trained staff is here to answer your questions and provide decades of experience with finding the right horse stall, barn supplies, and other equine products for your facility. Our team includes some of the most skilled horse stall and barn designers in the world, that's the System advantage.
