

# OptiMizer Hay Feeder

It takes less than a minute to fill the OptiMizer. Simply un-clip the slide arm and push it to the side of the OptiMizer. Add two bales of hay, cut and remove the twine, pull back, and re-clip the slide arm. You're done—slow feeding a day's hay in under a minute!

## Details:

- 48" by 48" by 34" tall
- Made of durable and lightweight Linear Low Density Polyethylene (LLDPE)—this is the same material that playground equipment and drinking water tanks are made from
- All corners are rounded with 1" diameters, making a smooth and safe surface if rubbed against
- The netting is made in Canada and supplied exclusively by Slow Feed Netting, the trusted and proven source of quality hay net products for horses
- Slide arm provides for smooth, one handed operation to open and close the feeder
- Slow feed netting hangs freely inside the feeder and conforms with the hay right to the bottom of the feeder
- Fits 2 small square bales up to 16" high and 42" long each—150 pounds of hay.
- 2-4 horses can comfortably eat at the same time from it

Part # 19-103
