

# WASH STALLS

*year-round convenience for bathing your horses*

A dedicated bathing or grooming area is considered a necessity in most barns. A wash stall allows you to bathe your horses in a clean, safe, and warm area—no more bathing outside in the mud! And you can now wash your horse year-round. Our complete wash stall product line includes shelving with expanded metal allowing you to organize your brushes, shampoos, sponges, and more. Blankets and towels are kept dry and clean using our blanket bars. Our wash stall wand includes a heavy-duty hose and high flow adjustable nozzle. If you are simply using a garden hose, use our hose guide to help keep it untangled and off the ground. Shelving can be purchased individually and can also be mounted to side walls. Figure out what you need and create a design that works for you!
