Introduction

Our Wellington Stall Series is inspired by classic European design. New to our family of stalls, the Wellington has replaced our Tuscany Stall Series. The Wellington offers what most homeowners themselves look for, an “open concept,” this one offering socialization, and ventilation options at their very best. The Wellington is distinguished by stylish side wings with a detailed slope, structured to create a barrier so horses cannot reach beside to one another and adding strong presence. The Wellington operates with a hinged door which incorporates the well-known Delron bushing system. This stall is available in a hot-dipped galvanized or a powder-coated finish. Choose from a large variety of options to suit your facility or give us a call if you had something else in mind.

- Shorter design for optimal socialization
- Ideal for buildings with low ceilings
- 5' high, 4.5" diameter steel posts with flanges
- Clean lines provide a structured look and feel
- Top off with decorative caps or finials to complete the high-end look
- Many upgrading options available
- Fully adjustable stainless steel hinges with rounded tabs to minimize injuries
- Available in both powder-coated colour or hot-dipped galvanized finishes

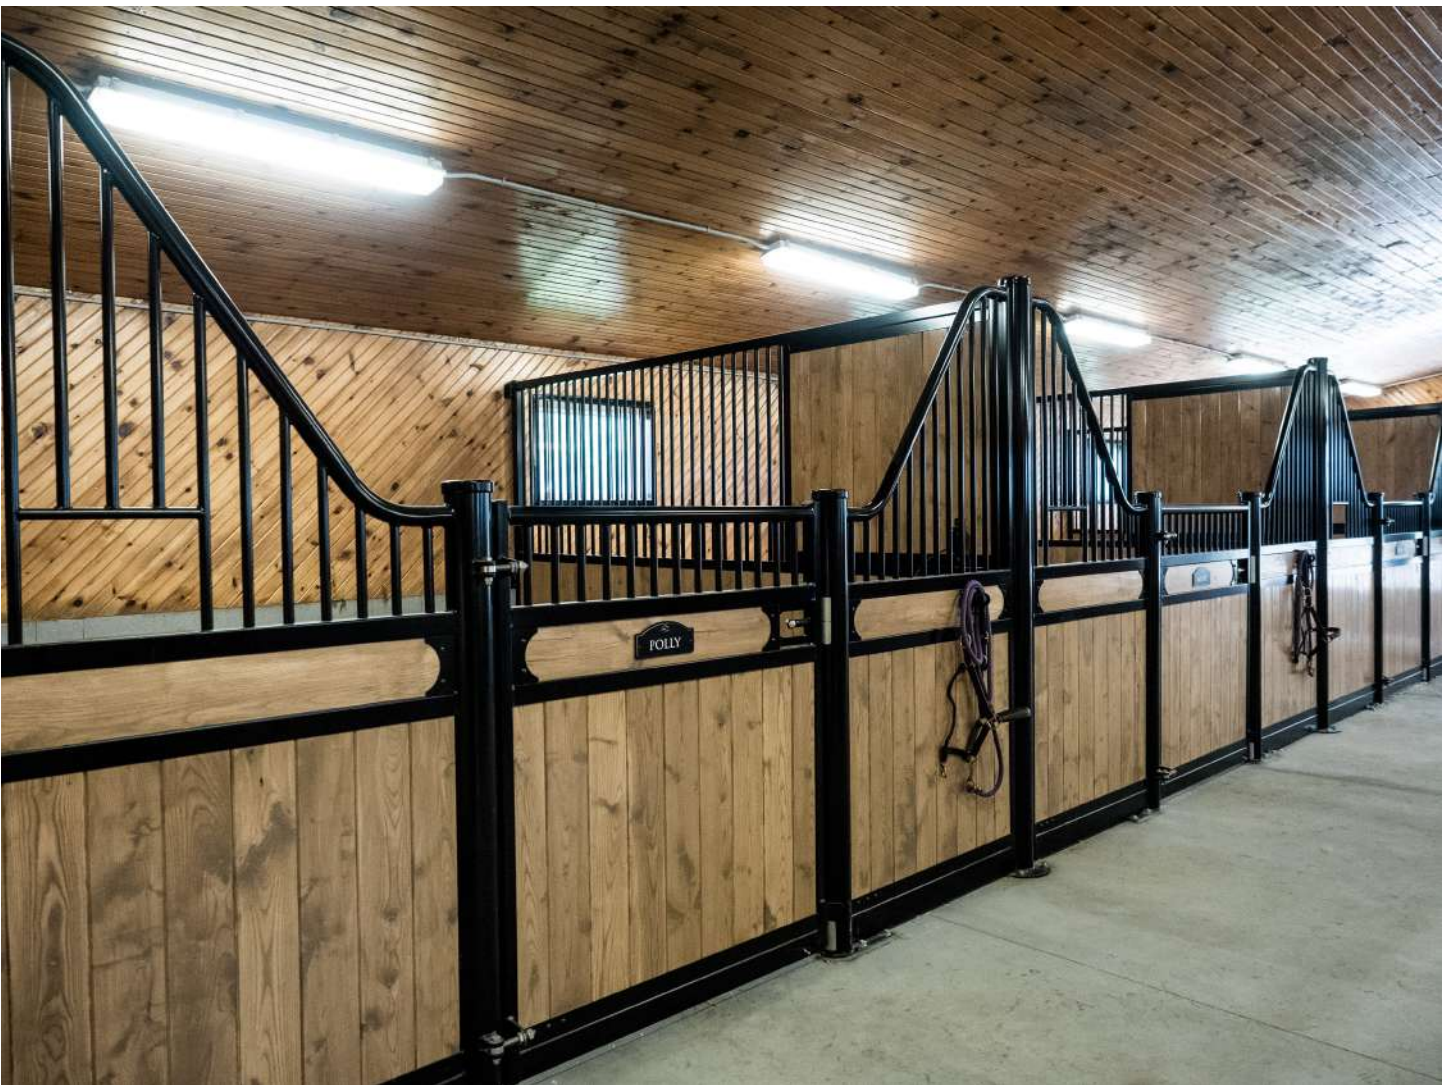

Why Choose System Stalls?

With so many options when choosing stalls for horses, things can sometimes be confusing; at System Equine we make it easier. Whether you own a two-stall private barn or a 60-stall boarding facility, you can be assured we have a stall system to meet your needs.

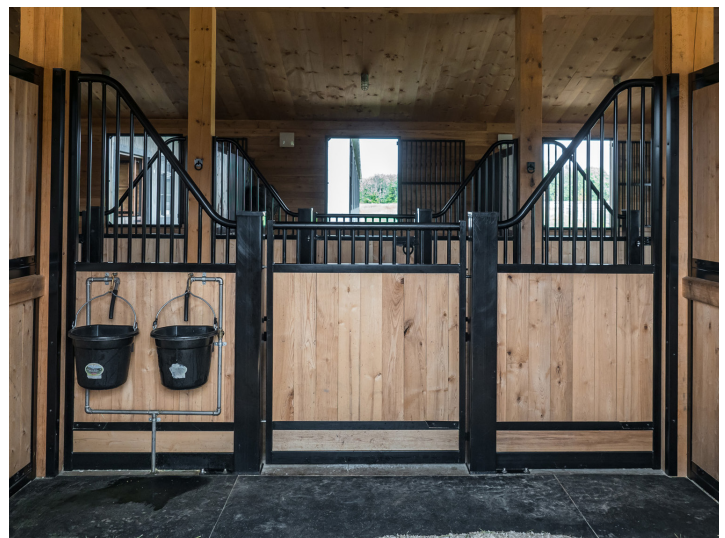

Our stalls are constructed with a high level of attention to detail, excellence of craftsmanship, along with the safety of horse and owner in mind. In our welded systems (every stall series except Standard), each bar is placed through pre-punched holes in the u-channel then welded securely in place for the most durability and best look. Alternatively, sonic welds or spot welding will show depletions over time. Our enclosed round track hardware for sliding doors and heavy-duty two-way adjustable hinges with Delran bushings will keep your stall functioning and feeling smooth for years to come.

Whichever stall system you choose, you can be sure that System Equine will be with you every step of the way. Our trained staff is here to answer your questions and provide decades of experience with finding the right horse stall, stall supplies, and other equine products for your facility. Our team includes some of the most skilled horse stall designers and builders in the world, that's the System advantage.

DESIGNER STALL COLLECTION HEAVY-DUTY PARTITIONS

Choosing partitions often depends on a few factors, such as the desired level of socialization between stalls, ventilation requirements, whether you require the option to change the size of your stalls as needed, and of course, personal preferences.

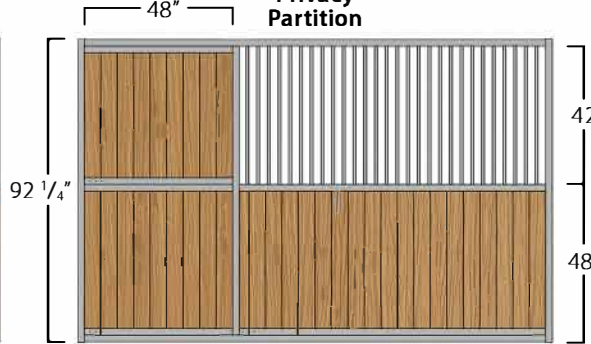

Grilled partitions are a great way to provide stalled horses with socialization and entertainment. They are an easy way to increase ventilation, thereby reducing the risk of respiratory issues in stalled horses. **Privacy partitions** provide all the benefits of grilled partitions, but also gives horses the option of socialization or privacy, which can be especially important during mealtimes. **Solid partitions** are often used in aisleways, in stalls housing stallions, and in quarantine barns.

They are best used in well-ventilated facilities. You can also opt for a solid partition to directly eliminate defensive behaviour between stalled horses. Feel free to contact us by phone or email to speak with one of our experienced sales reps about your partition options. They will ask you questions about your horses and barn, then direct you to the best options for your operation.

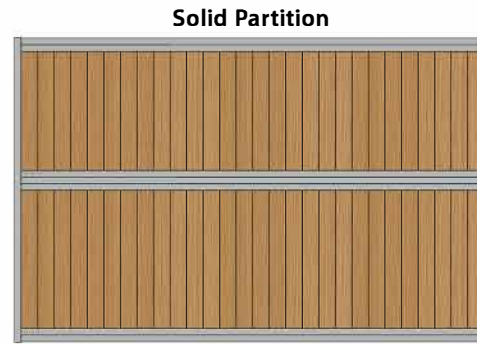

Includes: 92 1/4" high stall panel with a 42" high grilled social area on top. Standard length of 120" and 144" or custom sizes available.

Wood requirements (not included): 12x or 14x Tongue & Groove Ash boards for 10' or 12' partition
